Where a Thai mark can be lost

One page read by Typhoon, full-page task. Numbers are % of all reference marks (BQ prompt).

STAGE	MARKS LOST	DECODING
1 Find the line The text must be noticed first. Charts, ads and page headers are often skipped.	**2.3** whole line absent	No decoding remedy tested the line is never read
2 Read in order Columns may come out in another order than the reference.	**1.6** read in another order	Not an error of reading not charged by the order-free score
3 Stay on the page A span can be skipped, or the output can fall into a repetition loop.	**0.7** span missing	**Helps** stop at loop: +0.8 F1 **Hurts** repetition penalty: −1.3 F1 on loop-free pages
4 Choose the mark After a correct consonant, the tone mark is wrong only 0.65% of the time.	**1.5** misread	**Hurts** subtracting the language prior removes correct marks
